Shafran is engaged in consulting, guidance and management of security systems. In providing these services, the company specializes in planning and implementation of security strategies for organizations.

Core business

Shafran's activity focuses largely on the various fields of security systems at organizations – an activity encompassing the fields of physical security, information security, setup of technical security systems, foiling of industrial espionage, business reliability of organizations, loss reduction, investigations, and competitive intelligence.

Shafran has vast experience in developing and conducting "integrity checks" and providing instruction on credibility and reliability vetting to organizations. A thorough search for a company or individual 'red flags' by scrutinizing Israeli media and data bases, is our specialty.

Company reputation

Shafran, whose offices are located in Tel Aviv, has been active in both the domestic and the international markets since 1987. The company has a well-earned reputation for its thorough expertise, high professional level, reliability, commitment and service, with the strictest attention to protecting its clients' interests and maintaining complete discretion.

Commitment

Since its founding, Shafran has provided services to a broad spectrum of organizations and institutions. The company's services benefit dozens of clients, in both the public and the private sectors.

Shafran's provision of focused solutions tailored to the client's needs is one of the company's advantages. So is the professional and personal background of its managers, who filled senior posts in Israel's Security Agency and in the government and business sectors.
