## Check Point

**Check Point**  
SOFTWARE TECHNOLOGIES LTD.

### **Shimrit Frenkel**

Field Marketing Manager

+1-5516894563

sfrenkel@checkpoint.com

www.checkpoint.com

### **About the company**

Check Point Software Technologies Ltd. ([www.checkpoint.com](http://www.checkpoint.com)), is the largest pure-play security vendor globally, provides industry-leading solutions, and protects customers from cyberattacks with an unmatched catch rate of malware and other types of attacks.

### **Solution at a glance**

Check Point offers a complete security architecture defending enterprises' networks to mobile devices, in addition to the most comprehensive and intuitive security management. Check Point protects over 100,000 organizations of all sizes. At Check Point, we secure the future.

## CyberBit

### **Gary Leibowitz**

BD

+1-1580 519 818

gary.leibowitz@cyberbitsolutions.com

www.cyberbitc.com

### **About the company**

CYBERBIT's solutions span the full range of cyber intelligence and cybersecurity technologies with a focus on Critical Infrastructure Protection for Utilities and NERC compliant organizations.

### **Solution at a glance**

CYBERBIT's Cyber Portfolio, named CyberShield provides end to end technologies and services, including detection of potential malware and APTs, Cyber Intelligence, Cyber SOC Management, as well as Cyber personal training .The Portfolio includes Cyber Defense support on multiple levels • :CyberShield Analysis and Detection for Mobiles • CyberShield Analysis and Detection for IT networks • CyberShield Analysis and Detection for ICS networks • CyberShield Mitigation and Response • CyberShield Training and Simulation.

## ICS2

### **Omri Green**

VP Sales

+972-50-7736158

+1-516-6031023

omrig@ics2.com

www.ics2.com

### **About the company**

ICS2 is a cybersecurity company that develops innovative solutions for protecting critical infrastructure assets from advanced cyber-attacks and ensuring the operational efficiency of industrial plants.

### **Solution at a glance**

ICS2 has developed an innovative technology that makes it possible to detect an attack after an intrusion occurs but before damage is done, with a reach far beyond the capabilities of traditional IT security tools. The ICS2 solution is designed to detect intrusions to intricate plant control systems with their combination of servers, sensors, PLCs, data loggers, providing strong protection against intruder threats – before they succeed.

## Israel Electric Corporation

**חברת החשמל**  
Israel Electric

### **Meirav Peled**

Director of International  
Markets

+972-54-6091761

meirav.peled@iec.co.il

www.iec.co.il

### **About the company**

The Israel Electric Corp, \$ 7.7B, is the sole integrated electric utility in Israel, generating, transmitting and distributing substantially all the electricity used in the State. The Company faces both physical and cyber-attacks daily. These threats – whether from states, activists/hackers, or criminal organizations – pose a considerable challenge to all aspects of IEC's activities.

### **Solution at a glance**

Experience at IEC has induced the creation of a unique defense methodology encompassing physical and cyber security and implementing coordinated processes, which include Information Twig, the system of all systems for physical security; the National Cyber Control Center, as the technical operation arm, which oversees all security aspects; and CyberGym as the training arm. Today, IEC offers these solutions that transcend national and organizational boundaries. As a leader in operating and training in the complex, vulnerable and risky physical and cyber security worlds, IEC can become a partner in building a tailor-made, full-scale physical and cyber defense.

## NextNine

**Gal Yaffe**

VP Worldwide Sales

+972-54-5876123

gal.yaffe@nextnine.com

www.nextnine.com

### About the company

NextNine is a leader in Operational Technology (OT) Cybersecurity Management software for the industrial and critical infrastructure market .Top tier Enterprises and the largest industrial vendors have standardized on NextNine .The company has thousands of installations in oil, gas, mining, chemicals, energy, manufacturing, defence and critical infrastructure.

### Solution at a glance

NextNine provides a complete solution for centralized security management of distributed SCADA/ICS environments, enabling companies to enforce security policies, reduce cyber risks, gain visibility into vulnerabilities and meet compliance requirements . The NextNine platform supports assets & inventory management (across the IT and OT environments), compliance assurance, active monitoring and alerts mechanisms, remote and secure access into virtually any device using any protocol, synchronization of software updates, file transfers and distribution from the corporate into all remote plants – and many more functions .Over more than a decade, NextNine proved it is designed to scale and deliver value into mission-critical systems, with more than 6,000 installation worldwide.

## Radiflow

**Amit Slutzky**

Marketing Manager

+972-50-7547607

amit\_s@radiflow.com

www.radiflow.com

### About the company

Radiflow provides cyber security solutions for critical distributed automation substations.

### Solution at a glance

Radiflow's security tool-set validates the behavior of both M2M applications and H2M (Human-to-Machine) sessions within the distributed operational network. The solution is available both as in-line secure gateways for remote sites and as central monitoring tool. Combined, these solutions create a complete architecture for protecting SCADA network against cyber-attack .Radiflow's solution is mature with successful field-installations, validation by research labs and integration with complementary technologies such as SIEM tools, physical security systems and more.

## Senstar

### **Yossi Appelbaum**

Chief Technology Officer, Cyber Security Solutions

+1-240421-0669

yapplebom@senstar.com

www.cyber-seal.net

### **About the company**

Senstar, the trusted innovator safeguarding people, places and property, has been manufacturing, selling and supporting the world's largest portfolio of perimeter intrusion detection sensor technologies for more than 30 years.

### **Solution at a glance**

Senstar offers multi-layered protection for sub-station communication links, starting from the physical, through the network and up-to the application. Based on the Tungsten ruggedized Ethernet Security Appliance, our solution brings hassle-free installation and a low cost of ownership.

## Siga

### **About the company**

SIGA provides cyber security solutions that protect the end-device equipment in Industrial Control Systems (ICS) and Supervisory Control and Data Acquisition (SCADA) systems used in critical infrastructures and industrial processes.

### **Ian Kaplan**

VP Business Development

+972-54-4856798

ian@sigasec.com

www.sigasec.com

### **Solution at a glance**

SIGA's proprietary technology monitors the lowest layer of the OT level of SCADA systems to give early warning of any anomalous event so the operator can intervene before employees and civilians are harmed, physical damage is caused to equipment or the surrounding environment, and reputations are damaged. It is compatible with all legacy and new SCADA equipment, doesn't interfere with system operation in any way, and can't be circumvented.

## Verint Systems

### Ariel Cohen

VP Sales Cyber Solutions  
+972-54-4212777  
ariel.cohen@verint.com  
www.verint.com

### About the company

Verint® Systems Inc. (NASDAQ: VRNT) is a global leader in Actionable Intelligence® solutions for customer engagement optimization, security intelligence and fraud, risk and compliance, as well as providing world leading Cyber Security solutions. Today, more than 10,000 organizations in over 180 countries use Verint solutions to improve enterprise performance and make the world a safer place. Verint has almost 5,000 employees worldwide.

### Solution at a glance

Verint's Cyber Threat Protection System (TPS) for Power provides power companies with a dual-purpose solution: provides comprehensive protection to monitor web and email traffic, internal traffic, system logs and endpoints while automatically detecting attacks invisible to traditional defences. In addition, it enables new capabilities covering the Smart Grid (SCADA), its layers and partners.

## Waterfall Security Solutions

### Andrew Ginter

Director of Industrial Security  
+1-4032646002  
andrew.ginter@waterfall-security.com  
www.waterfall-security.com

### About the company

Waterfall Security is the leading provider of network cyber security products enabling safe and secure IT/OT integration for critical infrastructures, industrial sites and manufacturing facilities.

### Solution at a glance

The company develops products which provide stronger-than-firewall protection for industrial control networks. Waterfall Security's Unidirectional Security Gateways™, Flip™ and Application Data Control technologies are deployed worldwide in almost every industrial and critical infrastructure sector . Waterfall's Unidirectional Gateways are a combination of hardware and software which safely and securely integrate operations networks with business networks without introducing the cyber risks which always accompany –firewall deployments.
