AgriGo Group is a leading global EPC contractor with proven track record in development and launch of sustainable planet-friendly turnkey agricultural complexes in pigs, poultry, dairy and aquaculture industries.

AgriGo speaks the language of agriculture to give animals what they can't ask for, provide humanity with healthier nutritious, abundant produce and ensure high returns at the least ecological footprint.

- One-stop-shop: from feasibility study, financing solutions and engineering design to earthworks, construction, equipment supply and installation
- Proactive result-oriented management by expert team after project launch
- Technological Innovations to increase profitability and efficiency:
- Integrated construction solutions
- Smart ventilation
- Biosecurity systems, waste treatment and environmental protection
- FarmSee: Decision-Support monitoring system with individual pig recognition

Aura Smart Air

Aura Air. An all-in-one indoor air purification and quality intelligence system, Aura filters and disinfects indoor air through a unique 4 stage purification process while vigilantly monitoring its quality in real-time. When hazards are detected, Aura alerts you immediately, providing crucial intelligence as to the origin of the problem, solutions of how to rectify it, and alarms if immediate action or evacuation is required. While keeping you informed of the conditions inside your home, Aura also monitors outdoor air quality, providing you a holistic picture of today and what is to come tomorrow.

B.Tech Tools Group

Tech Tools is a leading company in the field of technical supply and manufacturing of tools and power tools.

The unique strength of the company's tools stems from the fact that almost every one of the company's products includes a unique patent. The company has 57 patents, and countless design patents. B. Tech Tools specializes in the manufacturing of all types of drill bits, threading, milling and lathe equipment. The company works with store suppliers in Israel and around the world, including in mega-chains located in the U.S. and Europe, in 106 different countries across the world, which benefit from the company's high-quality tools. The company's turnover amounts to NIS 78 million in Israel, €46 million in Europe and \$112 million in the U.S. B. Tech plans to build laboratories in Israel for promoting medicine, and to build a factory for manufacturing advanced tools systems and prototypes.

Cortica

Cortica is an Israeli company founded in 2007 with leading AI technology for autonomous platforms. The company's Autonomous AI is based upon proprietary brain research and utilizes unsupervised-learning methodologies backed by more than 200 patents. The Cortica AI understands the visual world on a human level - thereby significantly exceeding the capabilities of the industry. This Autonomous AI is embedded in next-generation, ultra-scale platforms where understanding images is a critical task. Cortica provides the intelligence that enables autonomous vehicles, smart cities, autonomous drones, and more. With headquarters in Tel Aviv and offices in NYC, Cortica has 100 employees including leading AI researchers and veterans of elite Israeli military intelligence units.

Elta Systems

ELTA Systems Ltd (“ELTA”), a Group and Subsidiary of the Israel Aerospace Industries (“IAI”).

IAI-ELTA is a Government owned Company and is one of Israel’s leading defense electronics companies and a global leader in a variety of areas. ELTA’s products are designed for Intelligence, Surveillance, Target Acquisition and Reconnaissance (ISTAR), Early Warning and Control, Homeland Security (HLS), Self-Protection and Self-Defense, Cyber and Fire Control applications.

IAI ELTA has more than 60 years of experience in designing, developing and producing state-of-the-art Intelligence systems (SIGINT: both Communication Intelligence & Electronic Intelligence), Electronic Warfare (EW) systems, Cyber Defence and Communication applications .

Notwithstanding, the past years have seen the evolution of these legacy domains, similarly to many other areas, towards Cyber space. ELTA is embracing the challenge, and based on its solid technological base, wide areas of expertise, rich legacy, and multi-disciplinary approach, is drawing the path to next generation solutions in the Cyber domain.

ELTA is the leading the IC3 (Israeli Cyber Companies Consortium) that includes 11 leading Israeli Cyber Companies each providing unique Cyber solution that integrated provides comprehensive National level Cyber defense solutions. Based on IAI-ELTA’s extensive experience, innovative solutions, and integrative approach, we are proud and pleased to present holistic, end-to-end National Cyber Defence solutions.

Founded in 1912, Technion is Israel's first university. Today, Technion is acclaimed as the source of ingenuity behind Israel's status as the world's "Start-Up Nation."

With 17 faculties and close to 60 research centers, Technion offers degrees in science and engineering, architecture, medicine, industrial management, and education. Technion's 600 faculty members include three Nobel Laureates. Proudly a global university, the Technion has a presence on three continents: Haifa (Israel), New York (USA), and Shantou (China).

The Technion's unique focus on interdisciplinary education challenges students to think differently about the world's problems, preparing students to become the next generation of global innovators. Technion innovation has a high global impact in areas including life-saving medicine, sustainable energy, water conservation, computer science, and nanotechnology.

Prof. Wolf earned all of his academic degrees from the faculty of Mechanical Engineering at the Technion Israel Institute of Technology in Israel. He then joined the robotics institute at Carnegie Mellon University (CMU) and associated hospitals. In March of 2006 Prof. Wolf returned to the Technion and founded the Biorobotics and Biomechanics Lab (BRML) where he develops fundamental theories in bio-kinematics and biomechanics as well as to apply these theories to applications in medical robotics and biorobotics
