AGRISRAEL4.0

Get Ready for Tomorrow's Agriculture

June 24-27 | 2019 | Israel

The fourth agricultural revolution will enable us to tackle yield, sustainability and other challenges using fewer resources. Since its establishment, Israel has been constantly introducing smart and efficient solutions in harsh environmental conditions. This is the era where Big Data, IT and IoT are revolutionizing the world of agriculture. Artificial intelligence, robotics, drones, satellites, sensors, algorithms and smartphones have become powerful tools that help farmers accurately manage growth.

Throughout the years, Israel's leadership in agricultural innovation and technology has introduced, time and again, cutting-edge solutions that address global challenges.

Israel, the Startup Nation, is proud to lead the digital agricultural revolution.

Over 500 companies

Over $670 million invested in Israeli Agtech

We invite you to discover cutting-edge technologies at the first event of its kind

AGRISRAEL4.0

What to Expect:

- Professional seminar - industry leaders discuss the trends that are driving the 4th agricultural revolution
- Live demos:
  1. Digital and robotic farming solutions
  2. Precision agriculture - sensors, drones, AI, satellite imagery
