

Israel - Digital Health Nation ⁽¹⁾

Israel is a small country and poor in natural resources but **rich in intellectual assets**. Dependent on the export of intelligent and sophisticated technologies, Israel has become one of the major global players in the creation of solution-driven products in the healthcare sector.

Ingredients for a successful product creation, above strong entrepreneurial spirit, are Human Capital, appropriate R&D infrastructure (corporate R&D centers or Tech. Incubators)... have to add also strong Government Support, powerful VC Community and HealthCare system itself.

Israeli Digital Health industry has its roots in a long history of using innovative communication technologies to improve healthcare delivery. With more than 25 years of expertise in implementing health IT, electronic

medical records and business analytics; today, **our Government is investing strongly in IT thus putting Israeli expertise in international demand**. And in March 2018, approximately **NIS 1 billion** has been budgeted for the extensive plan which includes technological development, international cooperation, concentrated academic and industrial efforts and regulatory changes to encourage data research **to developing the Digital Health Industries of tomorrow**.

The number of companies in the **Israeli Digital Health sector has risen substantially** in recent years, reaching **more than 450 companies in 2018**, all have a solution at Digital Health services that can be delivered through the web or mobile and can improve the lives of millions of people around the world.

Promoting Digital Health Worldwide

Digital Health is a dynamic sector that has the opportunity to dramatically improve healthcare service industry worldwide. Countries at all levels of development and sophistication in the healthcare, information and communication sectors can derive benefits from implementing Digital Health techs.

Our goal is to promote the use of transformative technology in healthcare for a brighter - healthier - future of society. We do so by bringing the global healthcare ecosystem closer together and creating better alignment and collaboration across borders and sectors.

<p>25 years</p>	<p>Israeli Digital Health uniqueness and Prime Time Moment lay in our advanced health system the scope and depth deploying E-Health policy for safety, security & quality, vast array of Tele-health services, 100% EMR at all health facilities for already more than 25 years.</p>
<p>264 Million \$</p>	<p>March 2018, approximately 1 billion NIS has been budgeted for the extensive plan which includes technological development, international cooperation, concentrated academic and industrial efforts and regularity changes to encourage data research to developing the Digital Health Industries of tomorrow.</p>
<p>450 Companies</p>	<p>Israeli Digital Health Industry has its roots in a long history of using innovative communication technologies to improve healthcare delivery; the power number of active companies has risen substantially in recent years, reaching more than 450 companies as of mid-2018.</p>

Digital Health – What’s next?

Telemedicine Growth – broader use is still ahead...

DATA Utility – Data-sharing is still NOT the Norm...

Artificial Intelligence – Getting comfortable with AI

Patient’s Integration – Awareness is the Key!
