ISRAEL EXPORT INSTITUTE

THE RETAIL INNOVATION ISRAEL

The Retail Innovation Israel, RE:IL event in Israel, initiated by the Israel Export Institute and the Foreign Trade Administration at the Ministry of Economy and Industry is our first and biggest virtual retail technology expo. The event will feature a virtual exhibition of 21 innovative Israeli companies in the field of retail technology and will feature an online F2F meeting arena.

In addition, the event will host three large scale webinars, for US, Europe and Asia. The COVID-19 situation took its toll on many of the world's businesses and critical thinking was applied. That's why we need to be RE: adapt with Retail Solutions in RE:IL – Retail Innovation Israel expo.

The purpose of the event is to facilitate personal business meetings between Israeli exporters and potential partners and customers from abroad.

BrandTotal

is a brand marketing analytics company that provides social media competitive intelligence for brands.

brandtotal.com

Categories

Data & Analytics

Solution at a Glance

BrandTotal provides competitive intelligence & social media insights for marketers. The competitive intelligence platform enables you to see exactly who your competitors are targeting, where their ads are appearing, what platforms they are using, and all of their creatives and core messages.

Our offering

Insights teams use BrandTotal to measure social share of voice, interactions & consumer sentiment trends over time. Brands can also benchmark these and similar metrics against the category overall.

Media teams use BrandTotal to track performance & identify opportunities to fill demographic gaps being left by the competition. Real time insights enable teams to shift budgets from channel to channel mid-campaign to optimize performance.

Creative teams use BrandTotal for creative inspiration, to see what types of creative and copy competitors are using for different channels, campaigns, and demographics - and see how they're performing.

Unique Selling Points and Differentiators

BrandTotal's social competitive intelligence Platform is the only marketing dashboard that provides real-time data and analytics into both public and dark posts across social media. Dark marketing campaigns account for over 85% of digital advertising – creating a segmented, fractured and non-viewable competitive environment for marketers. BrandTotal's powerful technology was developed to illuminate dark posts and provide actionable insights for agile marketers.

Donde Search

Shaping the future of online retail with AI Visual Discovery

www.dondesearch.com

Categories

AI Visual Discovery

Solution at a Glance

Donde Search uses Computer Vision and AI to automatically extract visual attributes from product images and turn them into unique style-based data that improves merchandising, personalization, and search across e-commerce platforms. Donde's platform has significantly increased these retailers' sales conversions and Average Order Value by up to 20%.

Our offering

Donde is leading the market with a rich set of attributes in the highest accuracy level that can support a true visual discovery for visual search navigation, similar item recommendation, complete the look and style-based personalization.

Visual Search Navigation is an exclusive and production proven solution.

Leverages the unique deep tags to create an intuitive Product discovery based on visual cues rather than words.

Unique Selling Points and Differentiators

More than 400 accurate classifiers. Accurate AI models based on attributes (not just a general similarity model).

Unique GenoMapper that understands user intent and journey and builds your shopper Style DNA and affinity for effective personalization.

Style DNA based algorithm (the only vendor with a complete set of attribute/style understanding).

Empower the user to refine the product recommendation by attribute and create a continuous discovery instead of one time result that will force the user to return back to browsing.

Market Beyond

provides mass merchants and brands with the ability to identify crucial gaps in their eCommerce offering and sales execution to drive profitable growth.

themarketbeyond.com

Categories

Data & Analytics

Solution at a Glance

Solution for Retailers: provides mass merchants and retailers with the ability to identify crucial gaps in their eCommerce offering and sales execution based on up-to-date competitive insights.

Solution for Brands: Providing vital visibility to retail eCommerce in order to grow brand presence and optimize brand experience

Our offering

Retailers and Brands such as eBay, FaceBook, BestBuy & Cocacola, seeking AI based digital shelf intelligence turn to Market Beyond to inform their merchandising decision-making processes while optimizing sales and driving a competitive assortment strategy to grow their online business

Unique Selling Points and Differentiators

Real Time SKU Level Intelligence - Insights on pricing, discoverability, inventory, product attributes and description, to name a few, can be a challenge to identify without a dedicated technology that offers actionable insights.

The use of advanced Machine Learning models help retailers quickly recognize their lowest hanging fruits, identify fast changes in the market, and adjust their sales strategy on a daily basis. With retail and eCommerce margins as tight as they are, actionable insights on SKU level inventory changes for products carried by the competition are absolutely essential.

Solution at a Glance

Since 2014, Namogoo has been leading the mission to eliminate Customer Journey Hijacking and win back stolen revenue for the world's leading online enterprises. Namogoo's deep learning platform ensures disruption-free customer journeys, enabling brands to instantly and consistently enhance eCommerce KPIs.

Our offering

Namogoo's Customer Hijacking Prevention technology eliminates unauthorized ad injections disrupting 20% of online customers and diverting them to competitors, immediately winning back stolen revenue and lifting their conversion rate.

Preventing Customer Journey Hijacking:

1. Brings back eCommerce revenue stolen by traffic hijackers
2. Instantly lifts conversion rate by 1.5-5% - guaranteed
3. Delivers an average 10X return on investment in the first month
4. Deployed within 30 minutes with no setup or maintenance required

Unique Selling Points and Differentiators

Our disruptive client-side technology identifies and blocks unauthorized ads injected into consumer web session. Using Machine learning technology analyzing over 1.5 billion web sessions and 20 billion page views per week across over 250 brands, our engine blacklists over 17K illegitimate domains per day, and ensures Zero false positive rate.

Placer.ai

Placer.ai is a location analytics platform providing actionable insights into any location

www.placer.ai

Categories

Data & Analytics

Solution at a Glance

Placer.ai is the most advanced foot traffic analytics platform allowing anyone with a stake in the physical world to instantly generate insights into any property. Placer.ai fully empowers professionals in retail, commercial real estate, and more to truly understand and maximize their offline activities.

Our offering

Placer.ai's dashboard is leveraged by leaders in CRE, retail, and hospitality to maximize site selection/marketing, and to optimize offline activities. Placer.ai helps customers understand performance, engage in deep competitive analysis, improve leasing conversations and maximize a retail footprint's effect.

Reporting capabilities include visit trends, True Trade Areas, cannibalization/void analysis, demographics, cross-shopping and favorite places. This data set combination streamlines activities and presents a unique mechanism for understanding the behavior of current and potential customers and for analyzing factors that drive success.

Unique Selling Points and Differentiators

Placer.ai has leveraged unique advantages in data science and product innovation to drive impressive growth since its launch in 2018. It is the only company to present both panel data and accurate estimations for any location in the U.S. Placer.ai's approach to product development leads to a monthly roll-out of new features and reports, further deepening the level of analysis users can reach. The combination of breadth and depth of reporting, alongside the platform's exceptional accessibility and timely insights, has led to strong growth in retail even during the COVID period.

Preciate Ltd

Preciate offers the most innovative payment solution that is fun and easy to use

www.preciate.me

Categories

Data & Analytics

Solution at a Glance

Preciate Pay is a payment method which enables customers of brick and mortar shops to pay without the use of a wallet, card, or mobile phone. The payment is activated with a single glance, making it the quickest, most convenient, and, in times of COVID19 concerns, most sterile way for shoppers to pay for goods.

Our offering

Preciate Pay is the ultimate facial recognition system, optimized for the real-life payment environment of a retail store. It is designed to shorten the checkout time and long queues, and drastically decrease shopping cart abandonment rate. Preciate Pay is also a great addition to any loyalty club, empowering existing features with unique, fun additions.

Unique Selling Points and Differentiators

Preciate's proprietary visual recognition system is the only system developed specifically for the retail industry. The system's unique features include: Enrollment through a mere "selfie" (self-portrait), quick identification of customers (less than two seconds), instant checkout. The system is non-intrusive, easily scalable and performs under a broad variety of lighting conditions.

Quicklizard

Dynamic pricing platform that delivers 10% increase in profit and 30% revenue increase

[Quicklizard.com](https://www.quicklizard.com)

Categories

Retail Automation

Solution at a Glance

The Quicklizard dynamic pricing platform synthesises data from a variety of internal and external sources to help retailers calculate and enforce their pricing strategy across all products. The platform uses a combination of AI, machine learning and user-defined rules to help retailers win the sales battle while reaching profit targets.

Our offering

Quicklizard provides retailers with a real-time dynamic pricing engine, capable of recommending and implementing prices in response to internal and external events. Our platform includes Intuitive dashboard, Seamless sync into commerce/ERP platforms, Fast and simple integration, and implementation. There are three modes of operation within the Quicklizard platform:

Rule-based dynamic pricing - Define and implement rules and constraints based on overall strategy, AI dynamic pricing - Leverage off-the-shelf algorithms based on market dynamics and Combine AI & rule-based pricing.

Unique Selling Points and Differentiators

While many systems rely on black-box AI implementation where users are forced to blindly trust the decision-making process, Quicklizard's AI recommendations are explainable. Users are given the reasons behind the pricing recommendations that the pricing engine offers, helping to build an enhanced layer of trust between user and machine.

Our machine learning algorithms leverage internal and external data sources to analyze historical prices, user behavior, and elasticity of demand. Our real-time anomaly detection algorithm relies on user behavior trends.

Our platform can be installed and running in just a few hours.

STORE-E

Automated data-driven task management tool that guides retail managers to excellence

www.mystore-e.com

Categories

Retail Automation

Solution at a Glance

We developed an algorithm that mimics the work of retail managers and implemented it in a task management tool explicitly designed for retailers.

This tool empowers the HQ just to set the right rules and manage an unlimited number of stores and employees remotely and automatically - reduce costs - save precious time - and increase sales.

Our offering

We offer retailers to let STORE-E guide & monitor their business in a short pilot.

STORE-E is managing the four rooms of the retail heart -

- Advanced Analytics With Actionable Insights In The Palm of Your Hand
- Data-Driven Planogram & Inventory Management Detecting, Forecasting, and *Alerting On Incidents That Impact Revenues On A Store Level with suggestions of how they should improve.
- Train & Empower Store Team

No data integration is needed for a pilot (we have more options)
All the training and more are on us.

The pilot is for free if we will have a green light to scale

A dedicated team member for everything you need - and always

Unique Selling Points and Differentiators

Our unique IP - Detecting, Forecasting, and Alerting On Incidents That Impact Revenues On A Store Level. Those incidents derived from the store's performance/sales and wrong implementation/compliance with the HQ guidelines.

The platform uncovers issues that heart customer experience and prevent sales from categories/products with high demand.

The automated data-driven platform guarantees all stores are always on the same page, set & ready to meet customers' expectations.

Facial Recognition

digital product
experience &
optimization

Solution at a Glance

An eCommerce product experience platform that delivers a cost-effective, interactive customer experience - at scale. The platform takes a retailers' existing product content & transforms it into an engaging, personalized UX (that includes Augmented Reality features) that's unique to every customer - no matter if web-based or app-based.

Our offering

An eCommerce shopping experience that gives shoppers the details (visually) they need on every product - details that provide confidence and clarity for a shopper to help them make the best decision possible - as if they were shopping in-store. The platform is scalable and requires only a single snippet of script added to a retailer's tag manager. Tangiblee builds, stylizes, and configures every retailer's experience while giving clients access to their analytics dashboard to monitor the impact such an experience has on their eCommerce performance as well as engagement performance.

Unique Selling Points and Differentiators

Tangiblee's platform is scalable, compatible with any framework, and typically goes live on 5,000 product pages within 10 business days. Unlike most customer experience UX's for eCommerce, Tangiblee delivers a seamless, impactful experience that customers need without requiring heavy integrations or technical requirements. Every retailer's experience is custom built for a fully-embedded, on-brand customer experience, proven to deliver significant impact to AOV, RPV, Return Rate, and Conversion rates.

Trigo

Trigo provides a frictionless shopping experience whose aim is to reshape the retail experience.

www.trigo.tech

Categories

AI & Voice Recognition,
Retail Automation
Data & Analytics

Solution at a Glance

Trigo allows customers to walk in walk out when grocery shopping. No need to wait in lines or exchange money with the cashier. The company's advanced retail automation platform identifies customers' shopping items with exceptional levels of accuracy, creating an entirely seamless checkout process.

Our offering

We offer an experience where shoppers simply walk into the store, while trigo's system creates an anonymous ID and follows their product interaction and product choices. Shoppers pick items the way they usually do, with no scanning needed while the system automatically detects when an item is taken off the shelf. The systems compiles all items into a virtual shopping list, enabling shoppers to simply leave the store without stopping at the checkout. Upon leaving, an automatically generated receipt is sent directly to the shoppers.

Unique Selling Points and Differentiators

Trigo uses off-the-shelf hardware and empowers it with proprietary algorithms enabling shoppers to simply walk in, pick items and walk out without stopping at the checkout. Trigo's system consists of ceiling-mounted cameras and sensors that automatically collect data on shopper's product interaction and product choices. Based on this data Trigo offers a range of additional solutions for grocery retailers, including predictive inventory management, pricing optimization, security and fraud prevention, planogram compliance and event-driven marketing.
