The National Energy and Water Program

Israel NEWTech was established in 2006 under the leadership of the Ministry of Economy and Industry, with the participation of ten government ministries and official organizations. Israel NEWTech focuses on water and energy technologies and provides an infrastructure that encourages the development of technologies in this sector.

For more information on Israel NEWTech, please visit: www.israelnewtech.gov.il

THE ISRAEL EXPORT & INTERNATIONAL COOPERATION INSTITUTE

The Israel Export & International Cooperation Institute

The Israel Export and International Cooperation Institute is your premier gateway for doing business with Israeli companies. Established and funded by the government and the private sector, IEICI's expertise in technology and product scouting, joint ventures and strategic alliances with Israeli companies spans more than half a century.

Whatever your field is, IEICI offers access to relevant businesses and government resources. With expertise in Israel's leading Industries, IEICI will provide the information you need to connect, negotiate and do business.

Cleantech, Energy & Environmental Technologies Department has an intimate acquaintance with the Israeli Cleantech industry exporters, which includes more than 400 companies, and about 200 start-ups. It has a proven ability to identify and match suitable potential business partners, organizing one-on-one business meetings and is a focal point for contacts with the government as well as with the industry.

Botschaft des Staates Israel
Economic and Trade Mission

Israel Trade Center in Munich Economic and Trade Mission - Embassy of the State of Israel in Germany

The Economic Mission to Berlin is responsible for enhancing bi-national trade relations between the Germany and Israeli business communities. The main fields of activity include promoting trade and exports, attracting and encouraging foreign investments and creating strategic cooperation with foreign companies. By leveraging its networking capacity and industry knowledge in Israel and Germany the Economic Mission is able to seamlessly engage prospective business partners half a world apart. Our operations span a variety of industry sectors, with a focus on high-tech, security, new media, cleantech and life sciences.

TIGI Ltd.....	16

Thermobit

ECS Ltd.

ECS Ltd. develops and manufactures innovative products for energy control and monitor in homes as well as for industrial facilities. The company's solutions target reduction in energy consumption, and specialize in IoT products. They focus on hot water solar and electrical boilers, communication protocols (WiFi and RF), and CCC (command and Control Center) products. ECS Ltd. employs professionals and experts in the hardware and software domains.

ENSTORAGE

EnStorage developed the most cost effective flow battery for grid scale energy storage. A self-contained system with over 10,000 cycles, it can serve as a grid asset for 20 years. The technology has 9 patents covering base materials, system & controls and a proprietary low cost membrane and catalyst. A 900KWh beta system has been deployed with AREVA and the company already secured a rate case for additional systems.

Kenotomi is a technology leader in the development and industrialization of novel solar panels delivering high solar conversion at lowest industry prices. Our proprietary Curtain Wall panels are ecologically clean and offer solutions to the BIPV (Building integrated Photo-Voltaic) and optimized for vertical installation where efficacy and architectural appearance are first priority.

Raycatch Ltd.

Raycatch is a SaaS AI for optimizing solar plants. Our SaaS runs over the production data coming from PV assets and is built to derive operational insights driven to optimize the plants yield. Our customers are PV plant owners (utilities, PV portfolio owners) which today manually operate their plants with an ambiguity that could lead to a significant loss in IRR.

SolView provides solar analytics on a massive scale: SolView's products identify the solar potential of every rooftop and help solar companies and electric utilities target and engage the best customers – increasing conversion rates while reducing customer acquisition costs. SolView's smart analytics are already improving the bottom-line for many customers in the US, and now SolView is extending its global reach.

SunBoost has developed the disruptive solar PV+ greenhouse, enabling for the first time profitable photovoltaic electricity on greenhouses and providing competitive agriculture. This is achieved by using proprietary optical glass booster panels with a special embossed pattern and tailored greenhouse designs. Our offering is transformative and will provide farmers and developers an additional, significant, bankable income without compromising crop yields.
